

ENTERPRISE RESOURCE PLANNING (ERP)

Solutions from Everest Consultants / ESN Technologies

Introduction

An Enterprise Resource Planning (ERP) system tightly integrates all the independent functions of a business and enables free flow of information across the enterprise. This would facilitate the functional managers involved in Inventory, Production, Marketing, Sales, Purchases, Finance, and Accounts etc to do automated transactions thus making the latest information available freely.

Microsoft Great Plains is one such software from Microsoft, which would capture some of the basic data, process it and reproduce the best possible reports. The system would tightly integrate all the modules to provide a wide range of information to take a better decision.

As the Business is Dynamic in nature, Microsoft Great Plains is totally scalable solution, which addresses the future requirements as well.

About Us

ESN Technologies (ESN) is a leading provider of high quality solutions in the realm of IT consulting and turnkey software development. ESN is the Offshore Development Center of Everest Consultants Inc. (ECI), a reputed software-consulting firm located in Beaverton, Oregon. ESN provides solutions using the latest technologies and develops high-end mission-critical e-Business applications that are guaranteed to perform.

We at **ECI & ESN** have developed deep expertise in select vertical markets. Within these markets, we focus on the major sectors that offer significant growth potential and that stand to benefit from strategic applications of information technology. In this way, we are able to understand our client's business environments, and to develop reusable tools and methodologies that support identified needs within these industries and speed the development of future solutions. In addition, we are able to help clients predict and adapt to changes within their industry -- however subtle -- preparing them to turn those shifts into new business opportunities.

Our Strengths

We are Microsoft Certified Partner and also Microsoft Great Plains Implementation Partner. We offer Microsoft Great Plains, which provides business applications that help small and mid-sized companies become more agile in today's interconnected economy. The Proposed ERP (Microsoft Great Plains) would automate financial and operational processes, and allow companies to extend specific information and procedures securely via the Web to employees, customers, suppliers and partners.

ESN has a vast pool of Technical consultants, Business Consultants and Systems Analysts who have a wide expertise in Microsoft Technologies and in studying the various corporate, their operations and understand the complexities and mapping the solutions for them.

We have many of management consultants associated who have a strong expertise customizing and implementing Microsoft Great Plains for a wide variety of industries

including Pharmaceutical, Bulk drug, Cosmetic, Automobile, Cement, Electronic and Engineering companies.
