

SUPPLY CHAIN MANAGEMENT

Solutions from Everest Consultants / ESN Technologies

Introduction

Supply chain management systems help in streamlining the processes of purchasing, material management production and order delivery. They help identify problem areas, reduce waste and inefficiency, and help the enterprise attain higher productivity levels.

Organizations can monitor and correct any situation in the entire supply chain -- outstanding purchase order delivery, vendor analysis, enforcing engineering change control, or shipping final goods to the customer. The spin off benefits include reduced lead times, lower inventory levels, faster financial transactions, and tighter control on all functions from sales order forecasting to order delivery and generation

About Us

ESN Technologies (ESN) is a leading provider of high quality solutions in the realm of IT consulting and turnkey software development. ESN is the Offshore Development Center of Everest Consultants Inc. (ECI), a reputed software-consulting firm located in Beaverton, Oregon. ESN provides solutions using the latest technologies and develops high-end mission-critical e-Business applications that are guaranteed to perform.

We at **ECI & ESN** have developed deep expertise in select vertical markets. Within these markets, we focus on the major sectors that offer significant growth potential and that stand to benefit from strategic applications of information technology. In this way, we are able to understand our client's business environments, and to develop reusable tools and methodologies that support identified needs within these industries and speed the development of future solutions. In addition, we are able to help clients predict and adapt to changes within their industry -- however subtle -- preparing them to turn those shifts into new business opportunities.

Our Strengths

We are Microsoft Certified Partner and also Microsoft Great Plains Implementation Partner. We offer Microsoft Great Plains, which provides business applications that help small and mid-sized companies become more agile in today's interconnected economy. The Proposed system (Microsoft Great Plains) would automate the entire supply chain from enquiry to final delivery and operational processes, and allow companies to extend specific information and procedures securely via the Web to employees, customers, suppliers and partners.

ESN has a vast pool of Technical consultants, Business Consultants and Systems Analysts who have a wide expertise in Microsoft Technologies and in studying the various corporate, their operations and understand the complexities and mapping the solutions for them.

We have many of management consultants associated who have a strong expertise customizing and implementing Microsoft Great Plains for a wide variety of industries including Pharmaceutical, Bulk drug, Cosmetic, Automobile, Cement, Electronic and Engineering companies.
